

Advice 26-2010 of the Scientific Committee of the FASFC on the project of royal decree to repeal the decree of the Regent of 29 march 1946 concerning mange in solidungulates and cattle

The Scientific Committee gives an advice on a project of royal decree to repeal the decree of the Regent of 29 march 1946 concerning mange in solidungulates and cattle.

The project of royal decree to repeal the decree of the Regent can, in its present state, not be approved because it makes no distinction between the situation in solidungulates and cattle and between the different types of mange in these species.

The Scientific Committee recommends to refine the regulatory basis for the control of mange in solidungulates and cattle in function of concrete and realistic objectives aimed at in the control of mange and in function of the species and the type of mange in the considered species.
