

Advice 13-2014 of the Scientific Committee of the FASFC on the phytosanitary part of the 2014 FASFC analysis program

The Scientific Committee has assessed the 2014 FASFC analysis program. This advice concerns the evaluation of the phytosanitary parameters.

The phytosanitary part of the 2014 FASFC analysis program is established consistently.

The Scientific Committee recommends inter alia to set up a phytosanitary monitoring system for rapid detection of potentially (= latently present) emerging pests and diseases.

The Scientific Committee also emphasizes the importance of sampling in the execution of the analysis program and makes several recommendations in this regard.
