

Common advice 22-2015 of the Scientific Committee of the FASFC and Superior Health Council 9289 : Response to the letter of the Ministers De Block M. and Borsus W. regarding the « potential effects of the dioxin crisis »

The Superior Health Council and the Scientific Committee of the FASFC conclude that the alarming messages which had appeared in the media regarding to the health effects due to the "dioxin crisis of 1999," have no solid scientific basis.
